

Cholesterol Management Flowchart

*If patients are unable to tolerate atorvastatin 80mg, consider reducing the dose, or switching to an alternative statin (e.g. rosuvastatin). Ensure patients are genuinely intolerant of statin before making any changes. Patients should be encouraged to try different statin preparations and/or lower than usual doses - for example:- atorvastatin 80mg → atorvastatin 40mg → atorvastatin 20mg → rosuvastatin 10mg → rosuvastatin 5mg.
